

Dairy Farm Benchmark Report

June 04, 2018

Summary

The overall efficiency score provides a measure of how efficiently an operation converts all of its inputs (feed, labour, capital, and miscellaneous expenses) into milk output (litres shipped). It is a measure of overall productivity of the operation and allows for comparison to peers' operations as well as your own operation year-to-year in order to track performance. The higher the score, the more efficiently the operation converts inputs into milk shipped.

Your operation's overall efficiency score is 0.38. The most efficient performing operation has an overall efficiency score of 1. The average overall efficiency score for all operations is 0.45.

The feed efficiency score provides a measure of how efficiently an operation converts feed into milk shipped. Feed expenses are often the highest variable cost for dairy operations and therefore a higher score may result lower costs per litre of milk shipped. Feed consumption is also highly correlated with greenhouse gas emissions from bovine animals. Therefore, herds with higher feed efficiency scores may produce lower levels of greenhouse gas emissions than comparative herds with lower scores.

Your feed efficiency score is 0.37. The most efficient performing operation has a feed efficiency score of 1. The average feed efficiency score for all operations is 0.44.

The following Table 1 provides a comparison between your operation, the average operation and the most efficient performing operation. The far right column calculates the difference between your operation and the top 10 most efficient Operations.

Table 1: Operation Comparison

	My Operation	Average Operation	Top 10 Operations	Difference
Milk Shipped (L)	3	3.6	3.9	-0.93
Number of Lactating Cows	1	1.0	1.0	0.00
Feed Expenses (\$)	2	2.1	2.1	-0.07
Labour Expenses (\$)	2	2.0	2.0	0.00
Capital Expenses (\$)	1	1.0	1.0	0.00
Miscellaneous Expenses (\$)	1	1.0	1.0	0.00

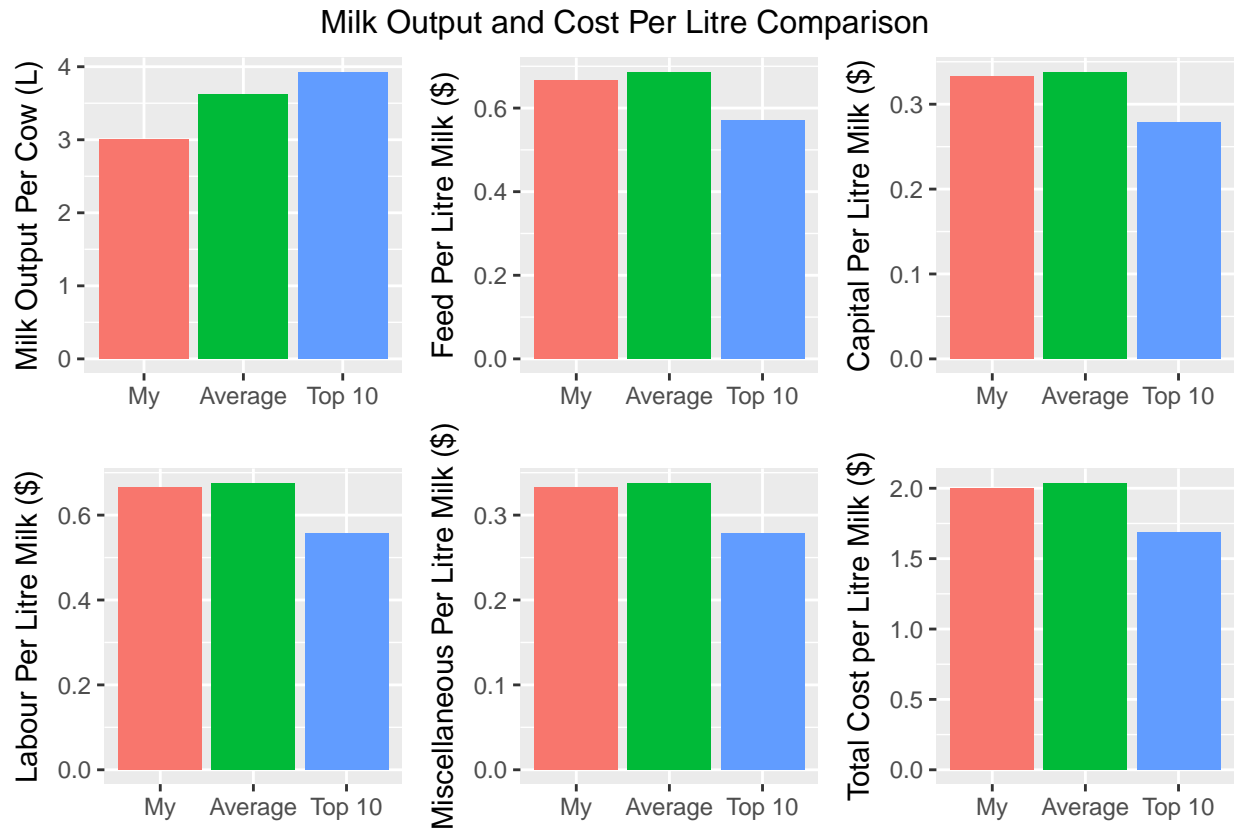

Table 2: Milk Output and Cost Per Litre Comparison

	My	Average	Top 10
Milk Output Per Cow (L)	3.00	3.62	3.93
Cost of Feed Per Litre Milk (\$)	0.67	0.69	0.57
Cost of Capital Per Litre Milk (\$)	0.33	0.34	0.28
Cost of Labour Per Litre Milk (\$)	0.67	0.68	0.56
Cost of Miscellaneous Per Litre Milk (\$)	0.33	0.34	0.28
Total Cost per Litre Milk (\$)	2.00	2.04	1.69

Productivity Measures

The following Table 2 provides a milk output per cow and cost per litre comparison between your operation, the average operation and the top 10 most performing operations.

The following Figures visually displays the information above.

Milk Yield Comparison

Your Milk Yield is 3 litres per cow. The average milk yield of all farms is 3.62 litres per cow.

Milk Yield is calculated by dividing the total amount of milk shipped by the average number of milking cows in the benchmark year.

The following figure shows the distribution of milk yield per cow. The milk yield per cow on your farm is marked in red.

Overall Efficiency

This figure displays your **overall efficiency score** in comparison to all other operations. The efficiency score of your farm is red.

The most efficient operations are located in the right of the graph and the least efficient operations are located in the left.

Feed Efficiency

This figure displays your **feed efficiency score** in comparison to all other operations. The efficiency score of your farm is red.

The most efficient operations are located in the right of the graph and the least efficient operations are located in the left.

Farm Characteristics and Performance

Overall Efficiency Score and Farm Characteristics

Farm Characteristics		Average Overall Efficiency Score
business type		
	Corporation	NaN
	Sole Proprietor	0.45
	Partnership	NaN
Education of Principal Operator		
	Primary School	0.45
	High School	NaN
	Diploma	NaN
	Community College	NaN
	Bachelor's Degree	NaN
	Post Grad Degree	NaN
Housing System		
	Tie Stall	0.45
	Free Stall	NaN
	Loose Housing	NaN
Milking System		
	Pipeline	0.45
	Parlour	NaN

	Farm Characteristics	Average Overall Efficiency Score
	Feeding System	
	Manual	0.45
	Semi-automated	NaN
	Fully automated	NaN
	Were milking cows milked using robots	
	Yes	0.45
	No	NaN
	Were milking cows fed using Total Mixed Ration	
	Yes	0.45
	No	NaN
	Were heifers fed using Total Mixed Ration	
	Yes	0.45
	No	NaN
Were milking cows separated and fed according to production level		
	Yes	0.45
	No	NaN
	Manure Handling System	
	Manual	0.45
	Stable Cleaner	NaN
	Manure Pack	NaN
	Liquid System	NaN
	Breed of Herd	
	Holstein	0.45
	Guernsey	NaN
	Jersey	NaN
	Brown Swiss	NaN
	Milking Shorthorn	NaN
	Ayrshire	NaN
	Enrolled in Milk Recording	
	Yes	0.45
	No	NaN

Feed Efficiency Score and Farm Characteristics

	Farm Characteristics	Average Feed Efficiency Score
	business type	
	Corporation	NaN
	Sole Proprietor	0.44
	Partnership	NaN
	Education of Principal Operator	
	Primary School	0.44
	High School	NaN
	Diploma	NaN
	Community College	NaN
	Bachelor's Degree	NaN
	Post Grad Degree	NaN
	Housing System	
	Tie Stall	0.44
	Free Stall	NaN
	Loose Housing	NaN

	Farm Characteristics	Average Feed Efficiency Score
	Milking System	
	Pipeline	0.44
	Parlour	NaN
	Feeding System	
	Manual	0.44
